

## PRW Officer Mental Survival

PRW--**Mental Survival**-April 13th,2012  
Broomfield, CO)

"You've trained for this right?" An intense one day course that discusses the dynamics of the new enemy police officers face daily on the street. Students will explore the mental, physical and emotional preparation necessary for officer survival not only during the inevitable critical incidents but over the course of an entire career.

This isn't one of those "hold hands and sing kum-by-ya" classes. Just heartfelt honesty from those who have been there.

This class is unique in that we ask you to bring your spouse, significant other or other concerned family member with you. Family members attend for free. (one family member per paid LE registration please)

Tuition includes textbook (\$25 value)

Tuition cost: \$150

To register go to the **PRW Store** at

<http://precisionrifleworkshop.com>

Or call 877-860-9475

PRW Instructors are drawn from the military and Colorado Police department SWAT teams for their exceptional experience and presentation skills.

Did you know that officer suicide is the most dangerous thing you'll face in Law enforcement over your career? Marital strife, Divorce, Addiction to alcohol, sex issues, abuse of prescription medications, depression, fallout from being an long term adrenaline junkie , and alimony payments are NOT mentioned in your initial police academy.

Anyone can be tough for 3-5 years in patrol, can you do it for 30?

Bring your spouse! It will open their eyes. But be prepared, you may have to explain your actions and emotions also. Something that will benefit you both.
